Mode

Press — next mode

Hold — next playlist

Power

Press — change brightness

Double-press — view battery

Hold — power on / off

Reset — press the pinhole with a toothpick or pin to restart.

Double-press pinhole to enter update mode.

USB-C — input 5V 3A

INSTALLATION & DRUM MODIFICATION

Aura Light attaches magnetically inside the bottom opening of your RAV Vast drum. The wooden plug must be removed for installation. Proceed at your own risk, as removal may cause damage or affect warranty coverage. Warm the plug with a hair dryer to soften the adhesive, then work it free by hand.

Visit spacecaptain.co/aura/setup for more information on wooden plug removal.

Playlists

Every mode is reactive. Strike the drum and the lights respond. Hold **Mode**, then release to land on a playlist.

GREEN

Full-color, flowing patterns that drift and breathe — reacting gently to your playing.

BLUE

Faster, brighter, high-energy modes that snap sharply to every hit.

RED · FAVORITES

Your personal set — every mode you mark as a favorite.

Best in the dark. Light projects out through the slits in the drum's tongues — the effect is most vivid in a pitch-black room.

SAVING A FAVORITE

On any mode you love, hold **Mode + Power** together to add or remove it from your favorites.

Visit spacecaptain.co/aura/preview to preview all modes.

Care & Support

BATTERY & CHARGING

- 1500mAh 3.7V Li-ion rechargeable
- 3-8 hr runtime · ~2.5 hr to full
- Any 5V USB-C charger (5V 3A)
- Don't leave charging unattended

CARE

- **Not waterproof** — keep away from water; never set it down in dirt or sand
- Clean with microfiber cloth
- Store cool & dry
- Do not expose to high heat such as direct sunlight or a hot vehicle
- If unusually hot or swollen, stop use

Scan for everything.
